Volvo launches the V90 Cross Country

VOLVO CARS ON Wednesday launched the V90 Cross Country in India for ₹60 lakh, ex-showroom, India. With this car, Volvo said it has created an entirely new segment in the Indian auto industry—since this car combines the attributes of a sedan, an SUV and an estate car. Tom von Bonsdorff, MD, Volvo Auto India, said, “The V90 Cross Country is the embodiment of a perfect ‘get away’ car. It has remarkable off-roading performance, on-road comfort and luxury, and is designed for Indian road conditions.” The V90 Cross Country has a ground clearance of 210mm—taller than most SUVs—and is powered by a 2.0-litre diesel engine that delivers 235bhp of power and 480Nm of torque.
